Project Management

1. Version Controlling System

- Centralized: Subversion

- Decentralized: Git

2. Building Tool: Maven

3. Issue Tracker: JIRA, HP Quality Center (QC)

4. Practice Followed: Continuous Integration (CI), Agile Development

Platform

- Base Platform: Linux (Ubuntu, Linux Mint)

- Alternate Platform: Windows7

Certification

Oracle Sun Certified Java Programmer in 2013

Professional Projects

MYRIAD

Company	Tata Consultancy Services
Description	**Data Acquisition and Management Platform for Credit and Market Risk:** ➤ MYRIAD is a platform for managing Credit risk (Insight) and Market Risk (RDS). ➤ The feeds from different source systems like DRD, DTD, DTCC, RDS, and Insight are processed through different phases of Myriad like ADP (Acquired Data Process), MDP (Mapping Data Process), CDP (Core Data Process) and PDP. ➤ Initially Feeds from different source systems are taken by ADP and after doing some basic volumetric checks, MDP sends the feeds as message queue which is persisted into Database by CDP at later stage. PDP extracts those data and generates data file and handshake file, which are moved to downstream systems by FTP client.
Role	Developer
Skills	Core Java, PL/SQL, Spring Basic
Tools Used	Eclipse, PL/SQL Developer, SSH Tactic Client, SVN
Contribution	➤ Coded in Java following Spring Framework and Spring Integration ➤ Developed PL/SQL Procedure ➤ Bug Fixes and Tuned Existing Code following best practices
Start Date	13th Aug, 2012
End Date	03rd Dec, 2013
Period	16 months
Team Size	45
Client	**Credit Suisse**

Personal Project 1

Project	AutomationModule **(June 2013 – Sep 2013)**
Duration	3 months
Description	Test Automation Framework with Selenium The basic purpose of preparing test automation framework is to shrink test cycle time and related costs. The project tries to achieve it with the help of open source tools and technology like Selenium 2.0 (Web driver), Eclipse and Java , Apache POI etc.
